

FF82

Flow switches for liquids with plastic casing and stainless steel paddle

FF82 flow switch controls the liquid flow in piping for cooling and heating systems.

ELECTRICAL FEATURES

SPDT single pole micro switch.

Nominal insulation voltage U_i 380V~
 Continuous nominal current I_{th} 10A
 Operating nominal current I_e :

Resistive load	AC-12	220V- -	250V- 16A
Inductive load	AC-15	-	3A
Direct current	DC-13	0,2A	-

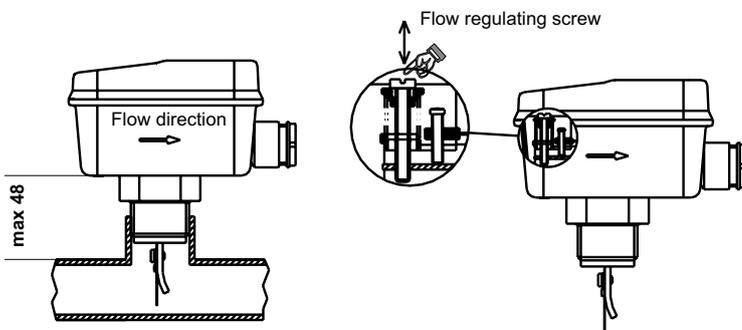

REGULATIONS AND APPROVALS

In compliance with EN 60947-5-1.

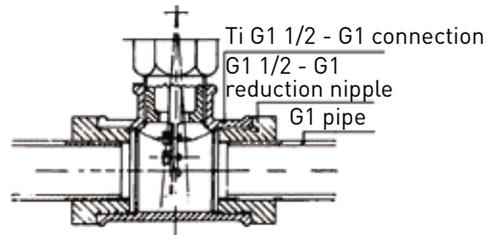

INSTALLATION

FF82 flow switch has to be installed on horizontal pipe sections, far from valves, pipe elbows, outlets or irregular flows.

INSTALLATION EXAMPLE FOR G2 - G10 PIPES

OPERATION

A flexible paddle, urged by the flow, operates on the actuation lever of a SPDT micro switch.

In heating systems with closed expansion duct where the circulation is assured by electro pumps, the heat input has to be automatically interrupted in case the circulation pumps are stopped.

When the flow is rising: it opens the C-NC contact and closes the C-NO contact.

When the flow is dropping: it closes the C-NC contact and opens the C-NO contact.

FEATURES

Shockproof thermoplastic casing.

AISI 301 stainless steel paddles for piping from G1 to G8.

Direct mounting with G1 threaded connection.

Electrical connections by 6,3mm female Faston.

Ground connection.

PG16 cable gland with concentric seal.

Maximum ambient temperature: 50°C.

Unit weight: Kg. 0,67.
